

Microsoft Small Business Server - Online

Microsoft Small Business Server Hosting from VirtuousIT - A complete solution from **ONLY £200 per month** (ex VAT)

In every industry, small businesses are under pressure to compete with limited resources and budget. What would you think about an IT model that not only eliminates large up-front costs for hardware, software, and implementation services, but also transfers all the daily headaches of managing the IT to someone else? What about one that can provide secure, enterprise-class messaging and collaboration capabilities on a 'pay as you go' basis?

Every day, more and more small businesses are adopting a hosted model of software use. This gives you flexible, cost-effective access to the latest technology, and is guaranteed to be secure, stable, and state of the art. VirtuousIT will take on the burden of managing the installation, availability, security, and upgrading of IT systems, leaving your employees to focus on driving the business and giving you peace of mind...

Windows Small Business Server is an advanced IT solution designed to help you protect your data, do more with less, and connect with customers like never before. SBS provides small businesses with many of the features used by large companies – e-mail, Internet connection, internal Web sites, remote access, support for mobile devices, file and printer sharing, backup and restore – all in one affordable, integrated solution.

- A cost effective solution offering all the vital business applications to run a small business with the efficiency you need.
- Minimal capital outlay, with no investment in hardware, software, training or implementation.
- Maximised uptime and reliable support network for guaranteed business continuity.
- Increased control on costs with predictable monthly payment structures.
- Reduced time managing technology freeing your time to develop and grow your business.
- Increased peace of mind, security and reduced technical burden through fully managed service including installation, maintenance, upgrades, patching and anti-virus protection.

An efficient solution customised to your specific needs from a team that understands your business.
